

Create a Desktop Shortcut Toolbar

It's a great deal easier to create the desktop shortcut toolbar in Vista.

1. Right click anywhere on the desktop
2. Go to New
3. Click Folder
4. A New Folder Appears on the desktop
5. Name it whatever is desired
6. Then drag it to one of the edges of the screen, it becomes a toolbar

7. Click and drag shortcut icons to the toolbar
8. Then, if desired, delete the desktop shortcuts
9. From here the toolbar options are the same as XP.
